04 Model to Model

05 Model to Text

06 Final Result

App to Exchange/Sell/Auction Items

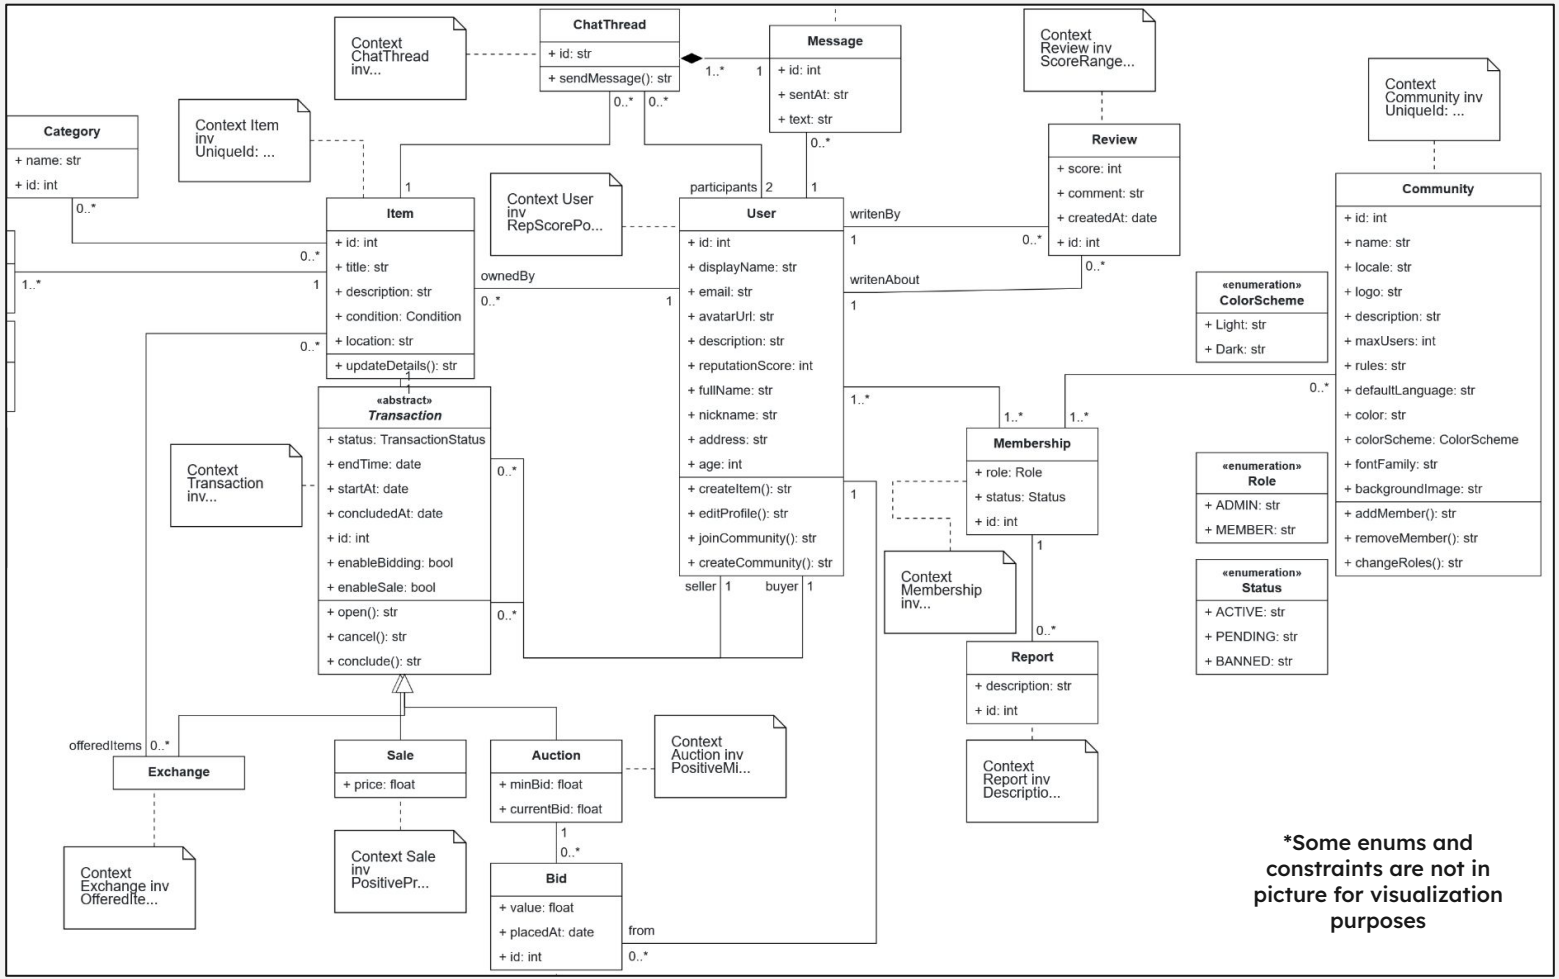

- **BESSER** framework to create structural, DSML and GUI metamodels
- Model2Model, using the **B-UML** and **Blocky**
  - Structural and GUI models
- Model to Text, using **Jinja**
  - ChatScreen, ListingDetailsScreen, CreateListingScreen

01

Structural Metamodel

Structural Metamodel

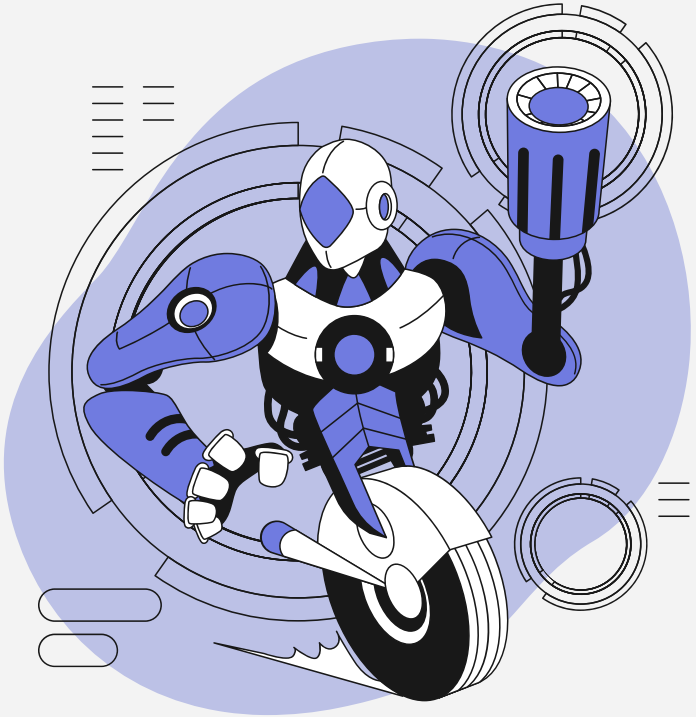

*Some enums and constraints are not in picture for visualization purposes

Structural Metamodel

Constraints include:

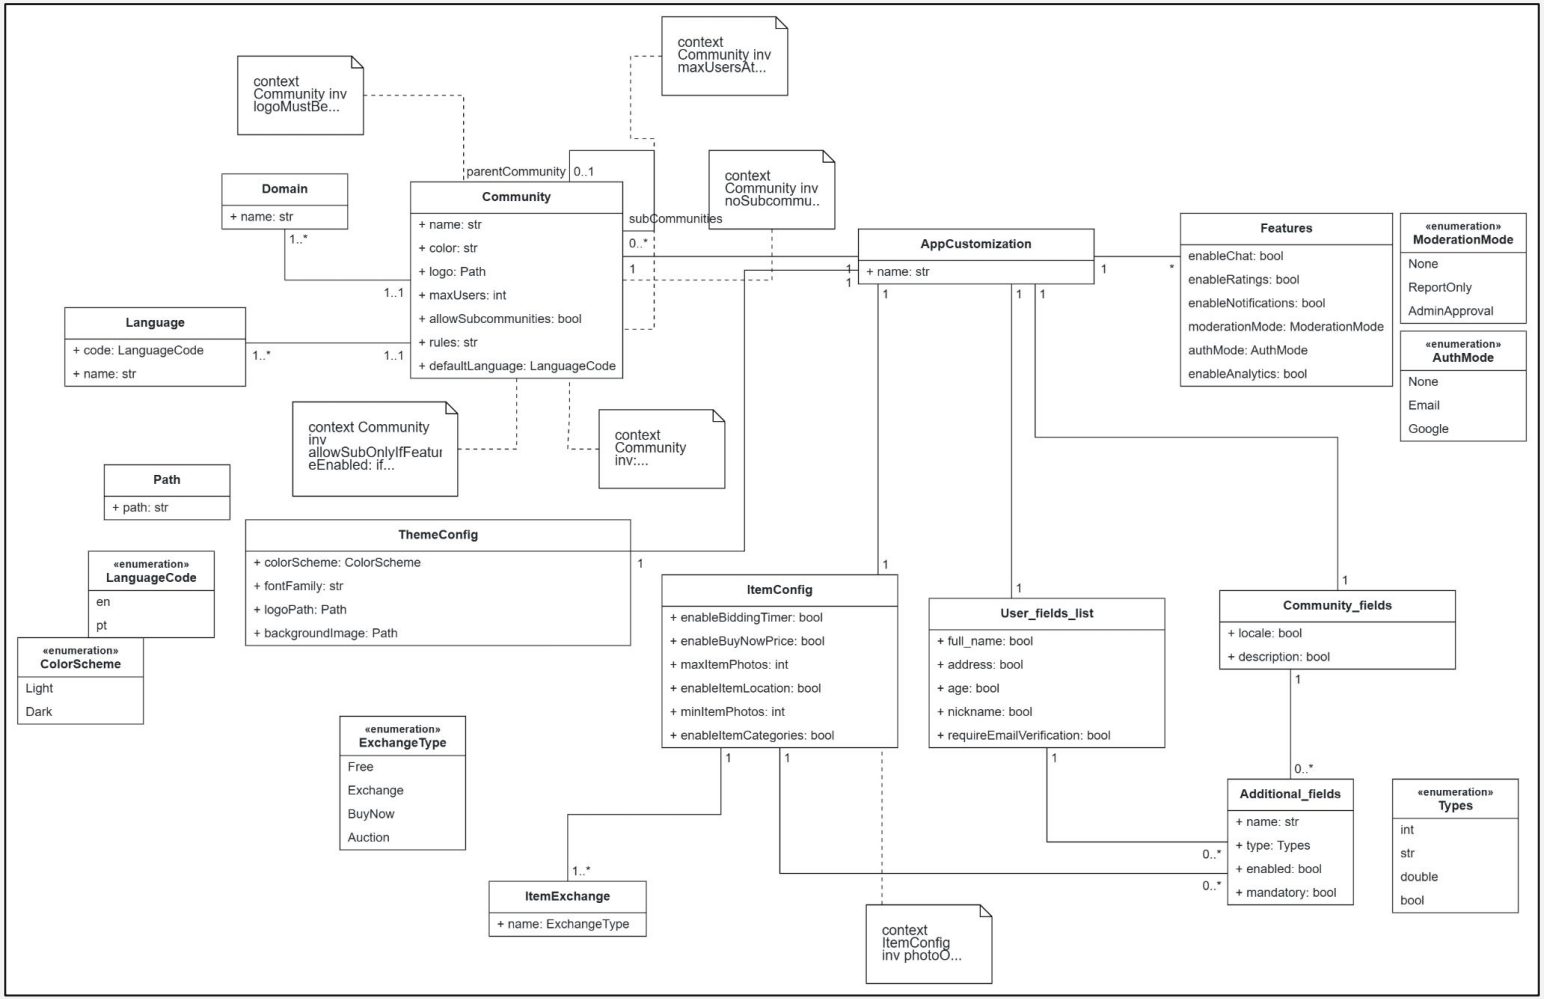

- Item
  - Must have a title, description, category and at least one photo
- User
  - Must have a unique id and email address and a reputation score between 0.0 and 5.0
- Community
  - Must have an unique name and description under 2000 characters

02

DSML Metamodel

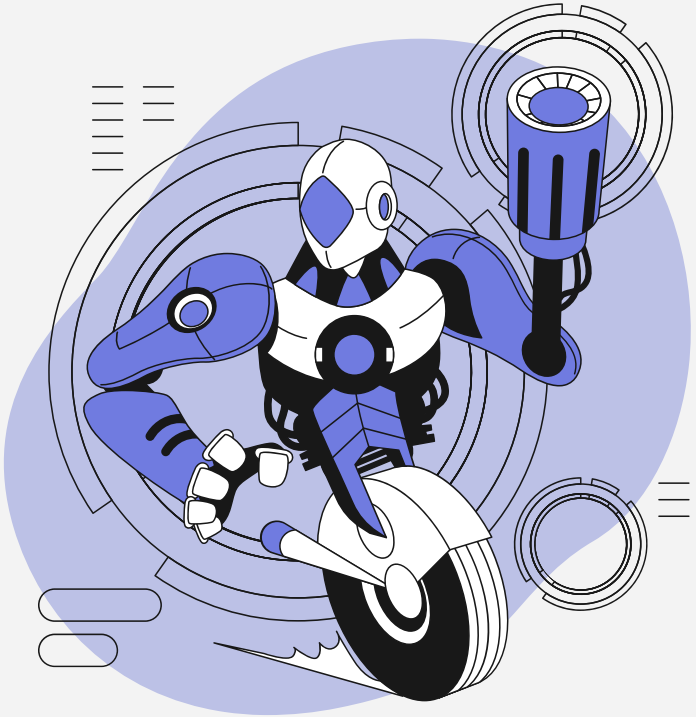

DSML Metamodel

DSML Metamodel

Constraints include:

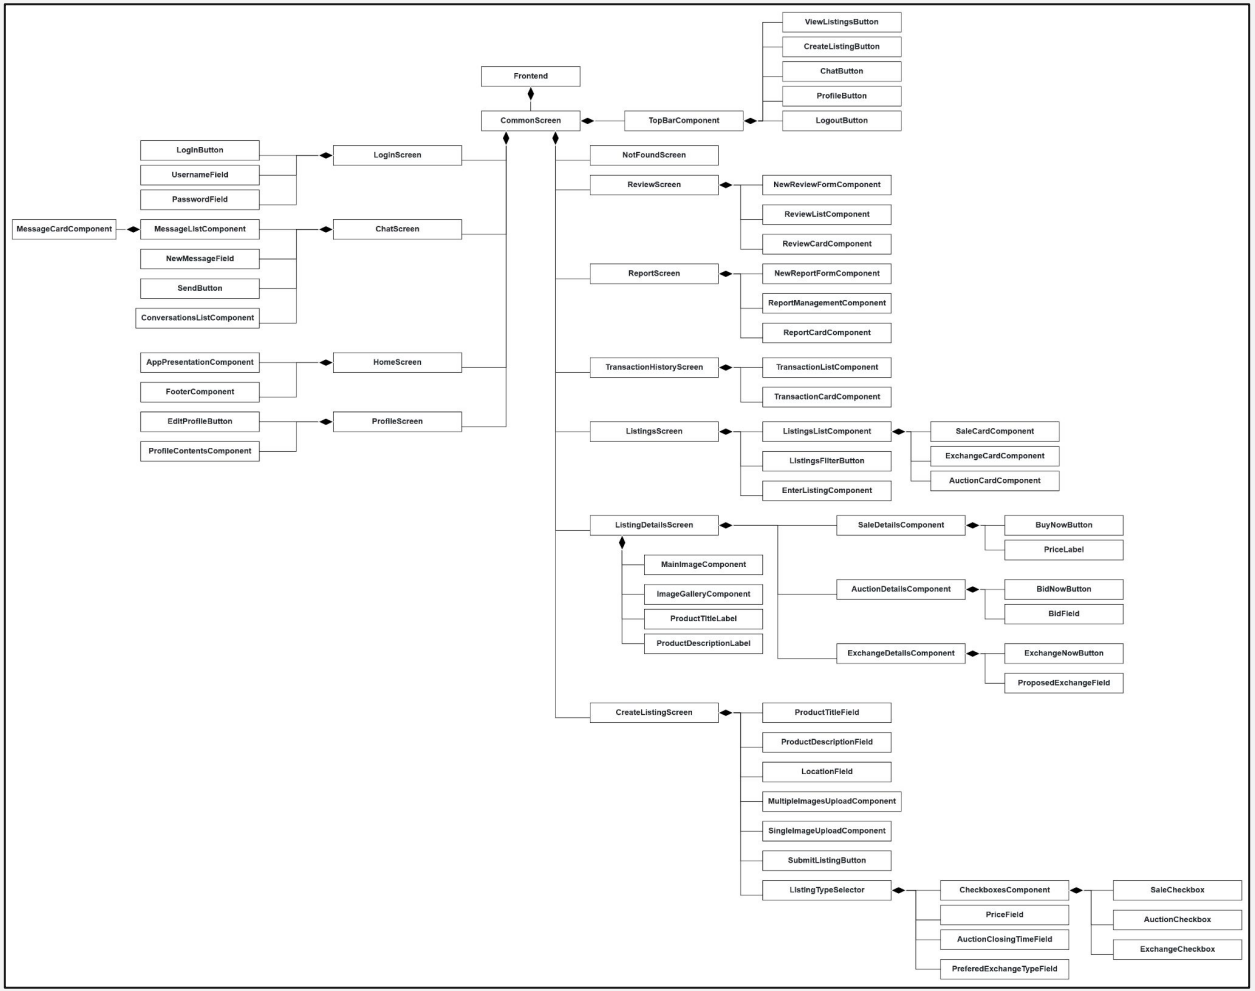

- A community that does not allow subcommunities must not contain any subcommunities
- A community cannot reference itself as its own parent community
- A community’s logo file must be an image, with a file extension of png, jpg, jpeg, gif, or svg

03

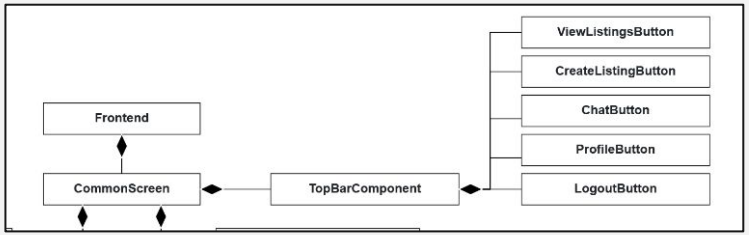

GUI Metamodel

GUI Metamodel

GUI Metamodel

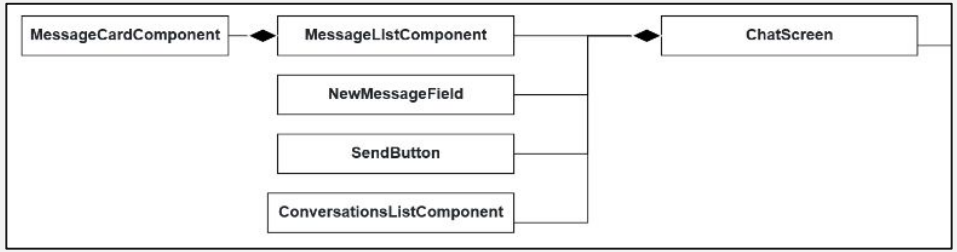

Common to all pages

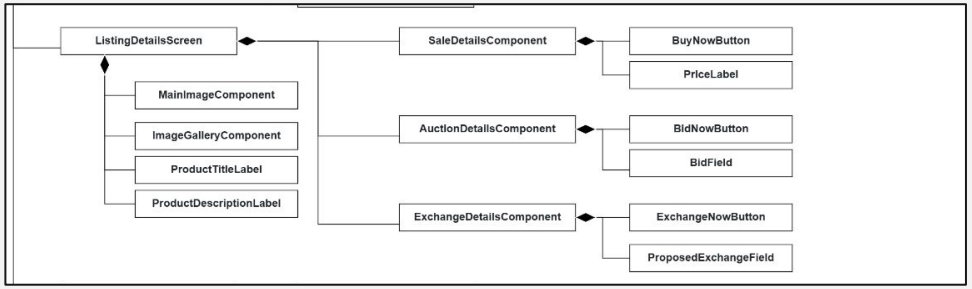

- LoginScreen
- ListingsScreen
- HomeScreen
- ProfileScreen
- ReviewScreen
- ReportScreen
- TransactionHistoryScreen
- **ChatScreen**
- **ListingDetailsScreen**
- **CreateListingScreen**

GUI Metamodel Pages to be Implemented

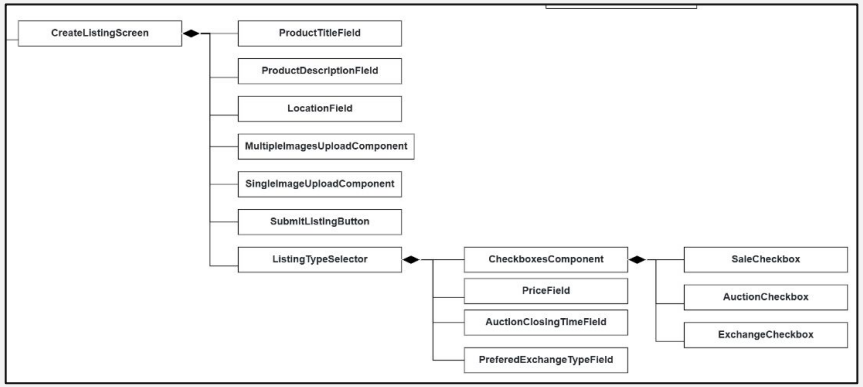

ChatScreen

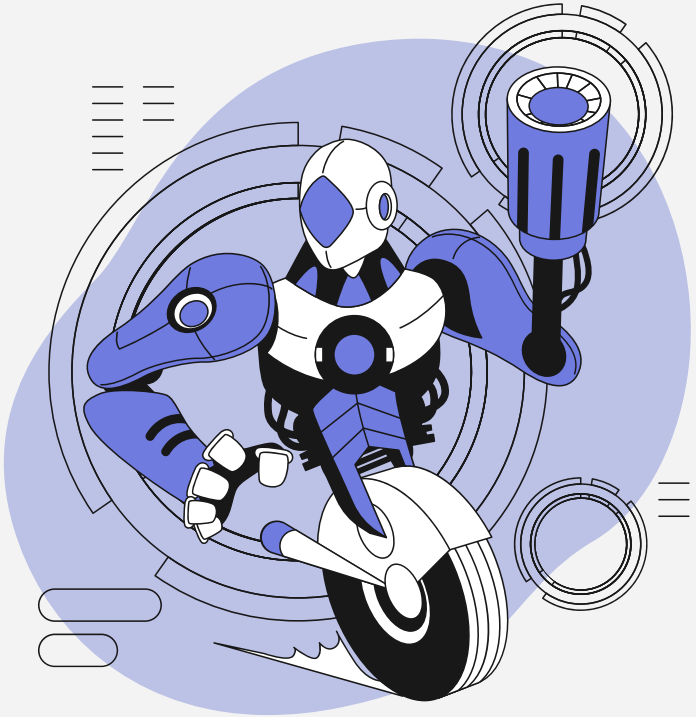

ListingDetailsScreen

CreateListingScreen

04

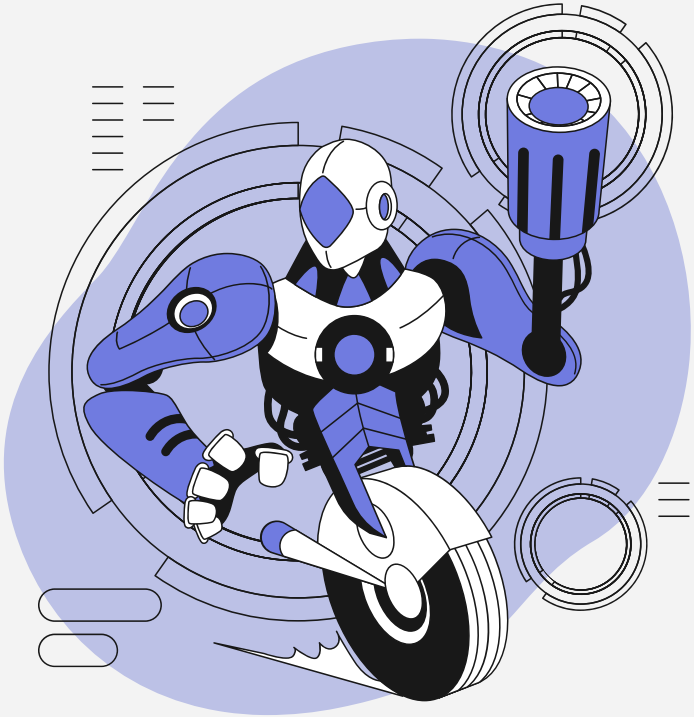

Model to Model

Model to Model

- Export the **BESSER** structural and GUI metamodel to B-UML
- Export the DSML metamodel to json and use **Blocky** to create the model and export to json
- Create a python script that consumes the B-UML and json and generates a **domain model** for both

Blocky

Online
Hi! Is the Canon 50mm lens still available?
10:30 AM
Yes, it is! Are you interested?
10:31 AM
Definitely. Does it have any scratches on the glass?
10:32 AM
No, it's pristine. I always used a lens.
10:32 AM
Perfect. Can I pick it up today at 5?
10:34 AM
Great, I'll see you then!
